2 New Scorecard + Pencil Holder

3 New Lid Lock

4 New Silicone Strap

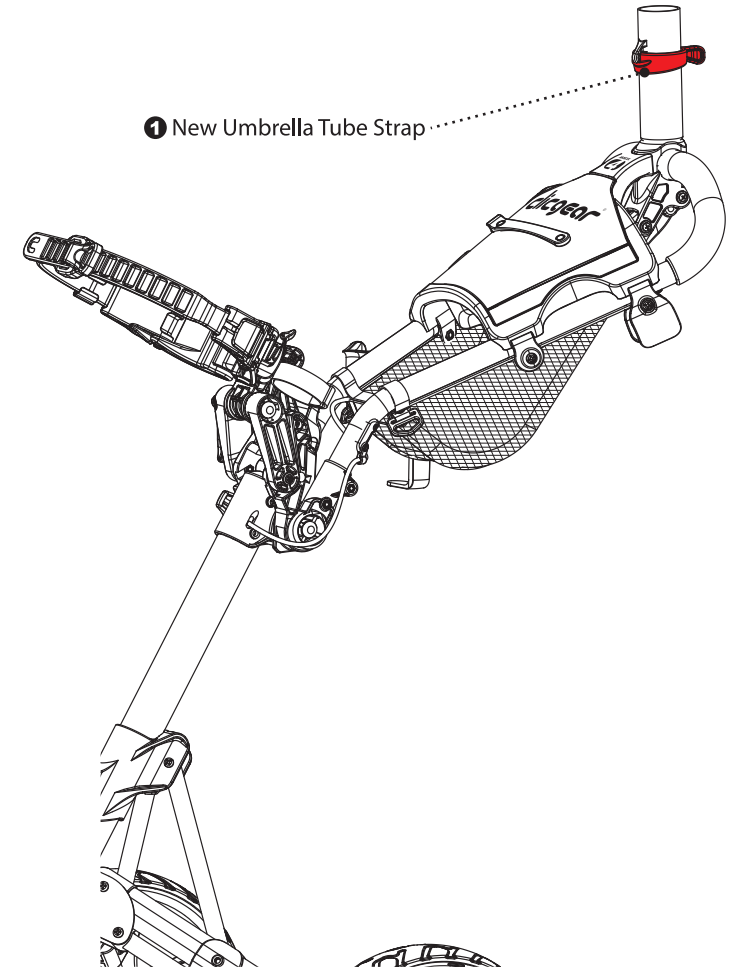

5 New Adjustable Upper Saddle

6 New Lower Saddle

PUSHING **YOU** FORWARD™

4

1 New Umbrella Tube Strap

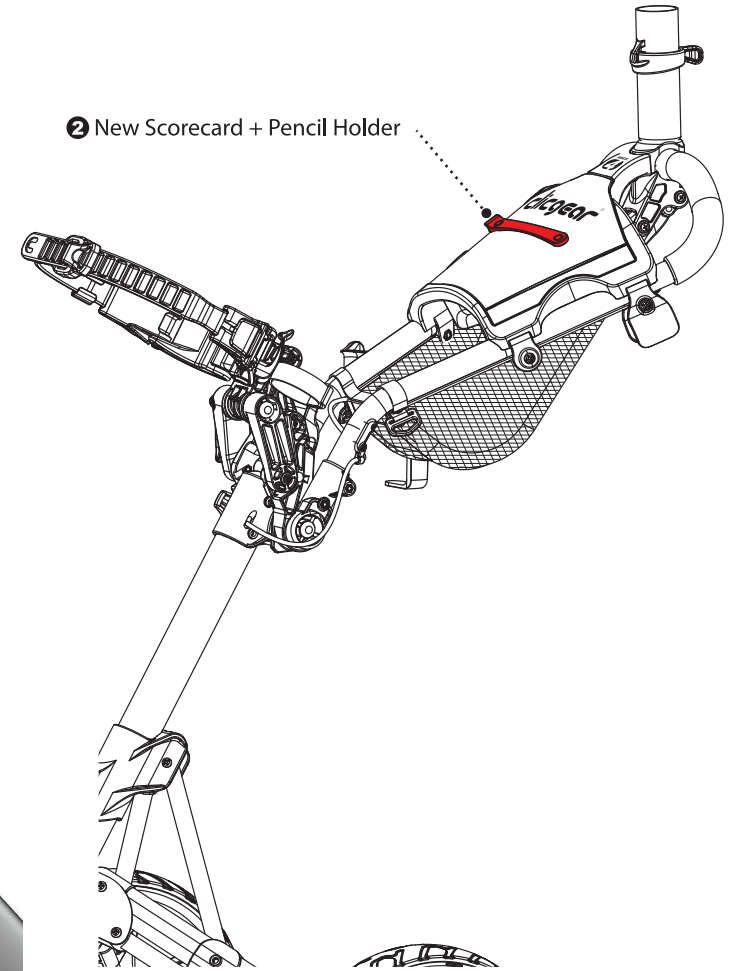

NEW UMBRELLA TUBE STRAP

The New Umbrella Tube Strap offers better grip on your umbrella. Improves the comfort for every round while reducing the chance of losing your favorite an umbrella to a sudden gust of wind. The strap color can be customized with a M4 Trim-Kit (sold separately).

4

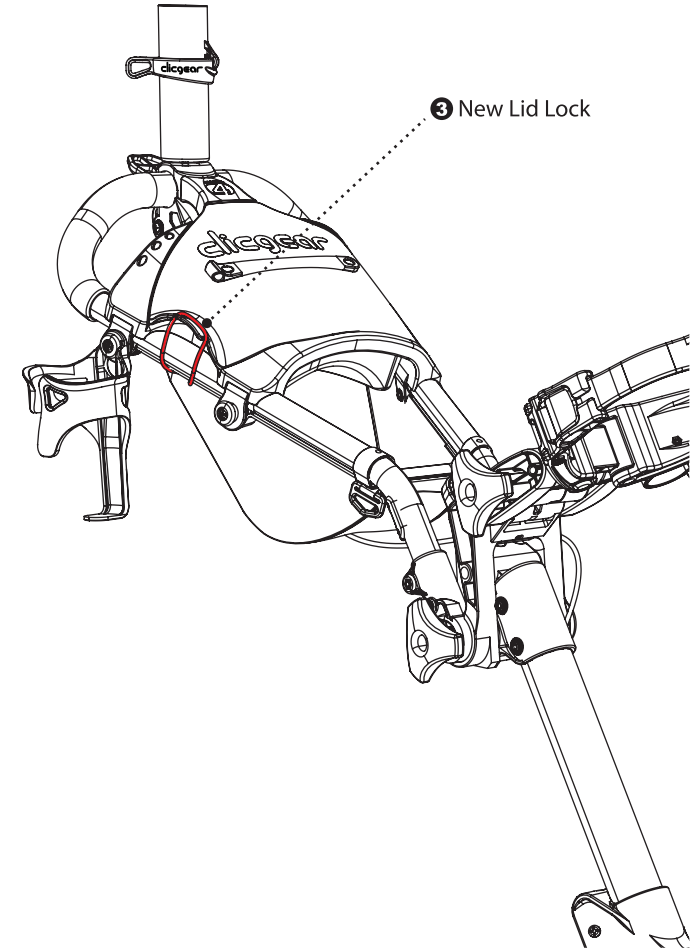

2 New Scorecard + Pencil Holder

NEW SCORECARD + PENCIL HOLDER

There is now a new stylish scorecard holder. It's silicone and does exactly what the old string version used to do, but it looks way cooler and costs more. The holder comes in many colors which can be customized with a M4 Trim-Kit (sold separately).

4

NEW LID LOCK

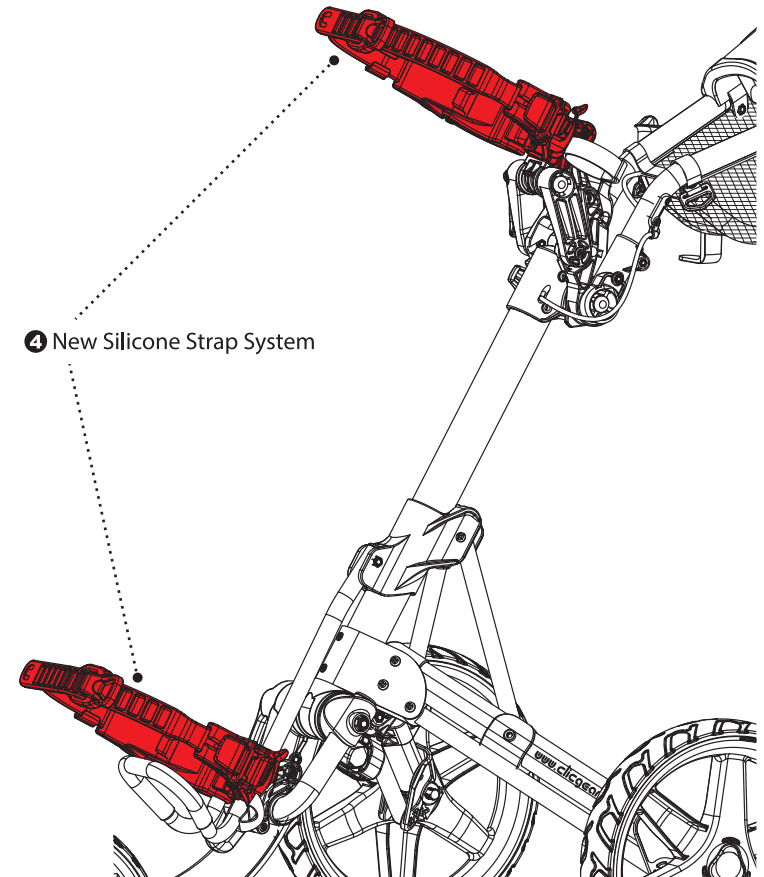

Finally, borrowing from a small and often overlooked detail on the Clicgear Model 8, we have now added a lid locking strap to the Model 4. This secures the console lid so that when transporting the cart to and from the course, you won't dump all your goodies stored in the console, all over the parking lot.

4 New Silicone Strap System

NEW SILICONE STRAP

We finally got tired of the old elastic straps, so we decided to vastly improve bag grip and adjustability for 2019. The result is the new Clicgear Silicone Strap System. The straps are infinitely adjustable right out of the box and are also gentle on your precious bag.

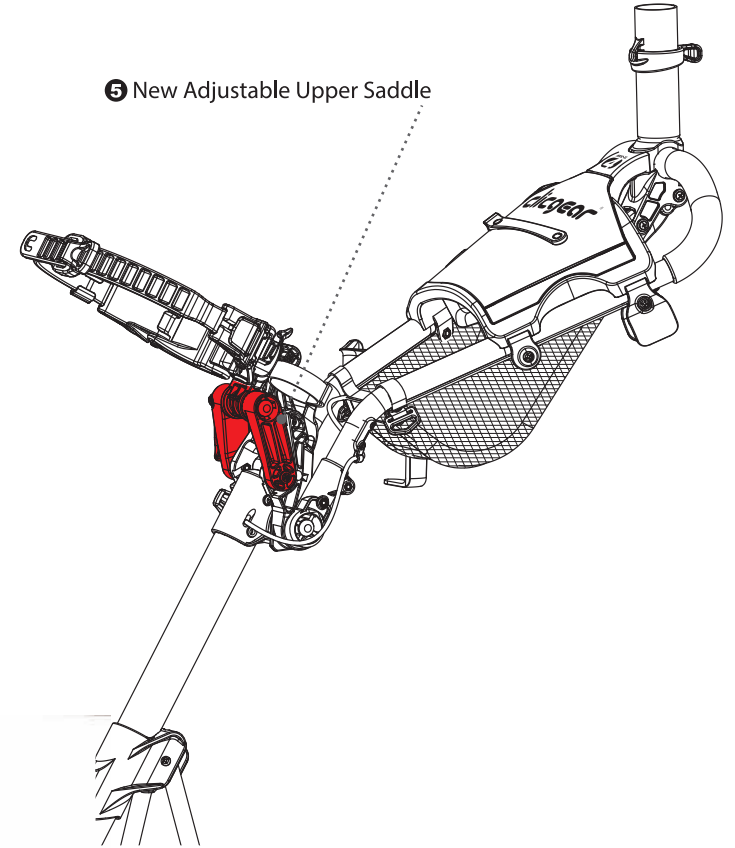

The straps also come in many colors which can be customized in seconds with a M4 Trim-Kit (sold separately). No tools required.

5 New Adjustable Upper Saddle

NEW ADJUSTABLE UPPER SADDLE

Now, one of the biggest and best changes on the new Model 4 is the Adjustable Upper Saddle. It's now super easy to adjust from a Junior bag to a full size bag in seconds and support it properly with our patent pending adjustable upper saddle system.

This adds a completely new approach and flexibility to what your cart can do with your cart. Now it fits exactly how you want it, whether you are a junior or a senior player.

Senior
33" (840mm)

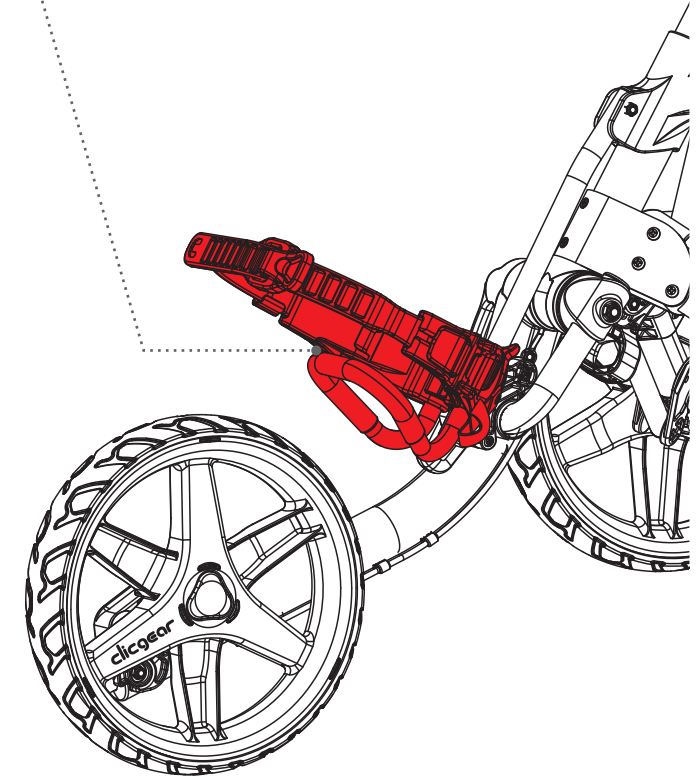

Junior
27" (685mm)

4

⑥ New Lower Saddle

NEW LOWER SADDLE

The Lower Saddle on the Clicgear M4 is modified to move the lower bag support up and away from the front wheel. Working with the Adjustable Upper Saddle, this allows better clearance between the bottom of some stand bags when positioned on the cart. This finally eliminates an annoying issue for some customers.
